5. (Unclassified - GLC) [redacted] OSI, called to say that the Atomic Energy Commission had called and requested a copy of the Director's prepared statement which he delivered to the Joint Committee on Atomic Energy on 18 March 1964. (This undoubtedly is prompted by Joint Committee contacts with the Commission regarding the proposed cut back in atomic energy programs.) [redacted] was advised that since the substance of this document was undoubtedly known to AEC and since it had been provided to the Joint Committee, we had no objection from our standpoint to its being passed to AEC. We suggested, however, that OSI might want to clear this with the DD/I.

6. (Unclassified - GLC) Mr. Goss, in the office of Representative Wilbur Mills, called regarding correspondence the Congressman has received from [redacted] a former Agency employee (retired for disability on determination by the Civil Service Commission). [redacted]

After checking with [redacted] Personnel, I advised Mr. Goss of the details of this case. [redacted]

[redacted] Mr. Goss seemed well satisfied with this information but will probably send us a letter so that they will have a written basis for a response [redacted]
